

Product Group Signals

VRS Railway Industry. A different view on signals

Reliable signals are foremost a requirement when we think about safety and availability on the railway network. VRS Railway Industry has been a producer of high quality railway safety systems such as signals since 1879. Performance reliability and durability are a given with all our products. However VRS Railway Industry is not only a supplier of signals. VRS Railway Industry also develops new signal products, signal systems and all related services. Therefore VRS Railway Industry has a complete different view on signals.

An extensive program

VRS Railway Industry's signal program is very extensive. Of course we deliver all possible signals and signal aspects. For different sizes or specific problems we can build signals completely to your specifications. Our own design department is happy to be at your service. VRS Railway Industry's signals are built based on LED technology.

VRS Railway Industry. An Innovator of choice

Signals based on LED-technology are at the base of the suppliers program. The signals virtually require no maintenance and are economical with regard to energy use. The longevity of LEDs makes the signals reliable, but additionally ensures that VRS Railway Industry's LED-signals are a sound investment. Next to headlights with different diameters, VRS Railway Industry also supplies signals with numerical or

character to provide additional information for the engineer. In our specific product information sheets

you will find all further information on VRS Railway Industry's signals.

Installation, maintenance and service

In addition to providing the signals, VRS Railway Industry also takes care of the installation and maintenance of the signals. We therefore also supply all possible signal poles and signal mounts. For signal gantries we supply complete mounting kits with mounting brackets, conduits including cables and junction boxes. With these kits the hanging of the signals to the gantries can be done fast and without errors. Our service department is responsible for maintenance and service work nationally and is if desired, attainable 24-hours a day. With VRS Railway Industry's signals you have one thing less to worry about!
